Note

In 1894 (el. 1), the Pres. of the Mysore City Munc.ty represented to Govt. the necessity for diverting from its present course and filling up the Doddalleve feeder channel (Bâmanhassanhalli feeder), on the ground of its being "a standing nuisance and annoyance to the people living close by."

The matter was referred to the San.y Engr. (el. 2), who submitted a precis of the correspondence on the subject, ending with the foll.g remark of the Dewan:- "Some better arrangement for feeding Doddlere requires. It may be feasible to abandon the present feeder altogether and give one from the Chamundi Hill side; if we can thus provide an equal drainage area it would solve our present difficulty once for all." Mr. Lee added that further action was deferred pending completion of the Kaveri Pumping Scheme, when a proposal to abandon the present feeder and to feed the Doddere with Kaveri water would be submitted

As the Kaveri pumping scheme has now been completed, the Pres. again solicits the orders of Govt

for filling up the channel by the Sanitary Dept.

No. 173 d/24-9-97.

2

The present letter may be forwarded to the San. Engr. with ref. to his letter of 30-3-94 (pl. 3) and for report as to what further action is now feasible.)

Sub to Govt 29/10 with a request that he may be good enough to state what further action is now feasible on the Sanitary side

for the reconsideration of
Govt & stated that as the
Channal overflowed du
ring the rainy season in
undating many houses
in Kachcheri Jn Walla
it was breached in Seve
ral places lent for want
of main Sewage drain,
all the Sewage water of
houses on both sides of the
Channal finds its way
into it and remains there
emitting very offensive
effluvia. The President
while admitting that there
is a drain work, stated
that owing to financial
difficulties it was beyond
the power of the Municipality
to carry out the same
and requested a deputation of
Govt. for carrying out
this work out of the

5

Sanitary Budget

The President having been asked to report what the probable cost of the work would be, now submits copies of a letter from the Sanitary Engineer stating that the cost would be Rs 7000 and that an estimate for the same was submitted to the Chief Engineer for sanction.

The President adds that, judging from the amount it seems to him that no provision has been made in it to build a drain for the storm & sewage water and in the absence of the same a portion of Krishnaraja Mohalla is likely to be inundated during the rainy season, besides the sewage waters stagnating in the road side.

From enquiries made

Municipal President's Office
GOVERNMENT OF MYSORE
Mysore city, Dated 3rd
January 1898.

From

The President
Mysore City Municipality.

To,

The Secretary
to the Government of Mysore.
Revenue and General Depts.

Sir,

With reference to Government
(Sl 10) Proceedings No. 4971-2 / L. S. 192-93 dated 5th November
1897 and previous correspondence in re-
the breaching and filling up of the feeder
channel to the Doddakere at Mysore,
I have the honor to submit herewith
the resolution of Board dated 4th
December 1897 for the reconsideration
of the Government and to state that
as the channel overflowed during
the last rainy season inundating
many houses in Krishnaraj Mohalla
it was breached in several places.

2 For want of main Sewage

drain in Krishnaraj Mohalla, all the sewage water of houses on both sides of the channel finds its way into it and remains there emitting very offensive effluvia till it is washed away into the big tank by the flood water during the rainy season. Owing to its unsanitary condition, so far back as 1890, it was decided to fill up and divert the channel. Projects prepared by the Sanitary Engineer one for diversion of the feeder and the other for the drainage of that part of the city are pending orders before the Government as will be seen from the copies of his dockets enclosed for reference.

3. This is no doubt a Municipal work as remarked by the Secretary Public Works Department but owing to financial difficulties it is beyond the power of the Municipality to carry out the same. The Government have already carried out many important sanitary works in the town in addition to the water project which has improved the General health of the public and the out break of epidemics has consequently

become rare and the only present want of the town is the proper drainage system.

I request that you will kindly obtain the orders of the Government for carrying out this work out of the Sanitary budget as it will be an everlasting boon to the inhabitants of this city

I have the honor to be
Sir
your most obedient Servant

J R Wetherall

× × × ×

II. Letter dated 23rd October 1897 from the Secretary to the Government of Mysore P.W.D. stating that as the Dewan ordered at the last Dasara meeting to breach the feeder channel to Doddakere at Mysore effect may be given to it by the Municipality as it is a municipal work and Government Proceedings No 4971-2 of 5th November 1897 stating that the above letter has been recorded.

Resolved that the Government be requested to reclaim the feeder as the present financial position of the Municipality does not permit it to undertake the work and the Board apprehends danger to the health of the town to have the feeder in its present breached condition.
